

Popular Education

Background

Include a form of popular education in universities, as many people talk about that, but do not always know or know well that it is suitable for incorporation as a tool.

Popular Education is Education for the People. Popular Education is a methodology of which we have to have knowledge able to develop a good work that is really close to the needs of the community with which we intend to work.

Submit the proposal for the different IPHU universities of our countries. Invite involved in the construction of curriculum university for the inclusion of the EP. Is Urgent change the academic curricula.

How can we implement what we are learning in our fields of action? Who knows, you have weapons organizational change. Need to work in the popular imagination to launch the idea of the concept of health doctor

Need to share in different action areas for each of us think the transformation of the content of IPHU so we can use as a tool multiplication from the Popular Education. Popular Education as a humanizadota of education in the communities, going to see the community a more comprehensive, impact on all the determinants health and in all respects. Training individuals with critical thinking.
